Superior Strength • Maximum Energy Efficiency • Total Comfort

SeriousWindows 300 Series

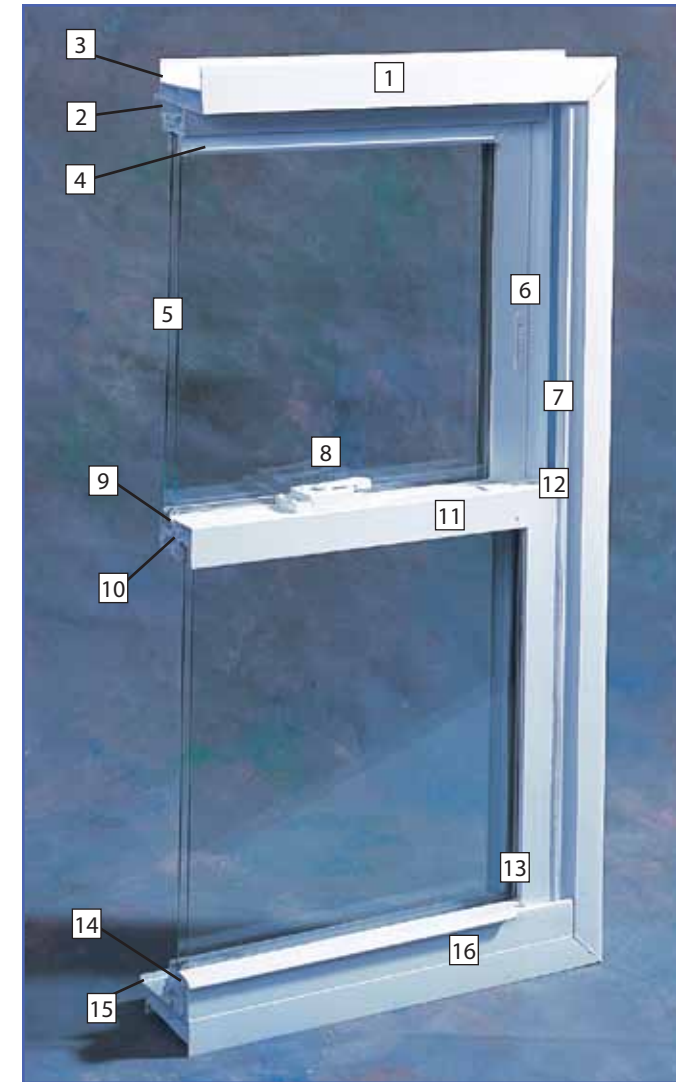

The SeriousWindows™ 300 provides the strength, thermal performance, beauty, and maintenance free qualities that make your lifestyle more comfortable.

They incorporate special options such as foam filled frames, and many other technological advancements in window design that provide dramatic improvements in thermal performance and strength. This means your home will be more comfortable throughout the year while reducing energy consumption.

The SeriousWindows 300 will enhance the overall appearance of your home. You'll appreciate their beauty while you enjoy the fact that they require virtually no maintenance or painting, ever. If the vinyl gets dirty, it cleans with a quick wash of soap and water.

The SeriousWindows 300 offers many options for customizing such as different styles of decorative grids(muntins) and colors. Ask your dealer to suggest additional design options available with the SeriousWindows 300 products.

1. Solid Vinyl Lineals with color clear through provide consistent quality from beginning to end.
2. Multi-Chambered Profiles with foam filled insulation provide strength, durability and reduce heating and costs year around.
3. Deep ReceiverHead Pocket greatly reduces the possibility of air/water infiltration and sashbowing.
4. Fusion Welded Sashes provide superior strength.
5. Optional High Performance Glass Packages can combine low emissivity glass and inert gases to achieve maximum window and glass performance.
6. Vent limits provide positive tops for ventilation.
7. High Performance Constant Force Sash Balances provide easy dependable operation and extended life.
8. Delux Cam Action Lock pulls the meeting rails tightly together in the locked position reducing air infiltration. This lock is pick resistant and exceeds the load requirements for AAMA 1302.5 Forced Entry Resistant Test.
9. Dual Durometer Glazing provides an air-tight, watertight, compression seal and pleasing appearance.
10. Double Seal Meeting Rail Insulator provides a tight seal and reduces air and water infiltration.
11. Tilt-in Sashes allow for easy glass cleaning.
12. High-Impact Nylon Sash Retainers lock sashes securely into the jambs. They are heavy-duty and color matched.
13. Full Integral Lift Rails on top and bottom sashes provide easy operation when opening or closing the window.
14. Deluxe Weather-stripping on sashes and frames features long-life polypropylene fin barriers surrounded by polypropylene pile for superb resistance to air, water, dust and noise. (Tested to AAMA 701.92 certification).
15. Revolutionary Sloped Sill provides improved drainage and attractive appearance.
16. 5/8" Dam Wall lowers chance of water back-up on sill.
 - Deluxe Half Screen with heavy extruded aluminum frame has fiberglass screen mesh with memory.
 - Limited lifetime warranty.

Designer Glass and Vinyl Color Options

White

Tan

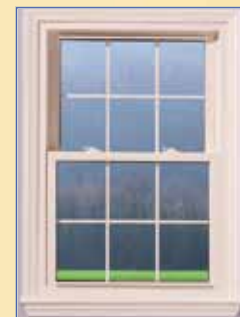

The SeriousWindow 300 is available in two standard vinyl colors. In addition, three styles of muntins are available: Diamond, QueenAnne and Colonial.

Diamond

Queen Anne

Colonial

The unique U-channel design of the Intercept

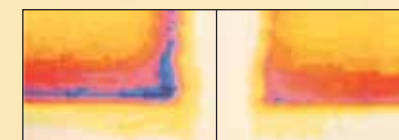

insulated glass spacer helps windows made with Intercept insulating glass create a thermal barrier that prevents heat and cold from passing through the window.

Warm Edge Technology

Conventional insulating glass

Intercept insulating glass

During seasonal temperature fluctuations the Intercept insulating glass spacer flexes to absorb thermal stress. This flexibility eliminates spacer movements as well as stress cracks and sealant failure providing years of peak performance and outstanding beauty.
