

OPTIONS

Enclosed we have provided a proposal for your new windows. We have proposed both the 5050 & 5500 series by **Simonton Windows**. We at Windoor feel that the Simonton 5500 Series window is superior over any other window on the market at this time and that the 5050 series is the best entry-level vinyl window offered today.

In our proposal we have included the price and listed options that are offered with both series. Below we describe in more detail all of the options that are available with these series. If you have any questions concerning these please check with a Windoor sales representative for further details.

We also invite you to visit our website (<http://www.windooronline.com>) which will link you directly to the Simonton website.

Internal Grills:

Decorative dividers that are between glass, available in Flat, Sculptured, Brass, or Shadow Beveled Cut Glass in Colonial, Prairie or Perimeter Styles. (Average cost for 5/8" Flat Colonial Grills - Other Styles Will be Higher

"Low E" Glass (emissivity) SoftCoat With Argon:

Low 'E' is a nearly invisible coating on the inside of the glass that reflects ultra violet rays, reflects heat from the sun during summer months and allows energy to pass through during winter months. Simonton combines Low 'E' with heavier-than-air "Argon" gas for even better energy savings.

SuperSpacer: (The most advanced system for insulating glass.)

Benefits: Warmer glass, 1" overall thickness, double strength comes automatically, cuts down on possible condensation. (Super Spacer only available with purchase of Low "E")

"Solar System (AR)" Glass Package With Double Low E and Argon:

Simonton combines a soft coat application of Low 'E' on the inside of both of the Double Strength panes for twice the protection from ultra violet rays. The Solar System (AR) package combines Double Low 'E' with "Argon" gas and the 1" Super Spacer for maximum insulation.

"LoE-366 " Glass Package With Low E and Argon:

Simonton combines a application of LoE-366 on the inside of the Double Strength glass for even greater protection from ultra violet rays. This package combines LoE-366 with "Argon" gas and the 1" Super Spacer for maximum insulation.

Foam Wrap Frames:

Foam insulation for perimeter of window (recommended when replacing wood windows).

Double Strength Glass:

Adds strength to glass, helps with sound density, automatic 3-year glass breakage warranty. Included w/some pkgs.

		Avg cost / window	
		5050	5500
Internal Grills:		\$ 25	\$ 25
