

# REFLECTIONS®

BY SIMONTON

When it comes to quality vinyl replacement windows Windowor has dozens of choices. When our name is on the line and customer satisfaction matters most, we choose Simonton.

***Simonton windows give you what other windows cannot;***

- **Better Engineering**

Easier to operate and easier to clean using a heavier gauge virgin vinyl than most manufacturers

- **Lap-Lok® Meeting Rail**

Overlaps & interlocks sash for a tighter seal, virtually eliminating water and air infiltration.

- **Simonton Sill®**

During Heavy rains, the exclusive stepped, sloped design forces water away from the window more quickly than flat, conventional sills.

- **Air Lok™**

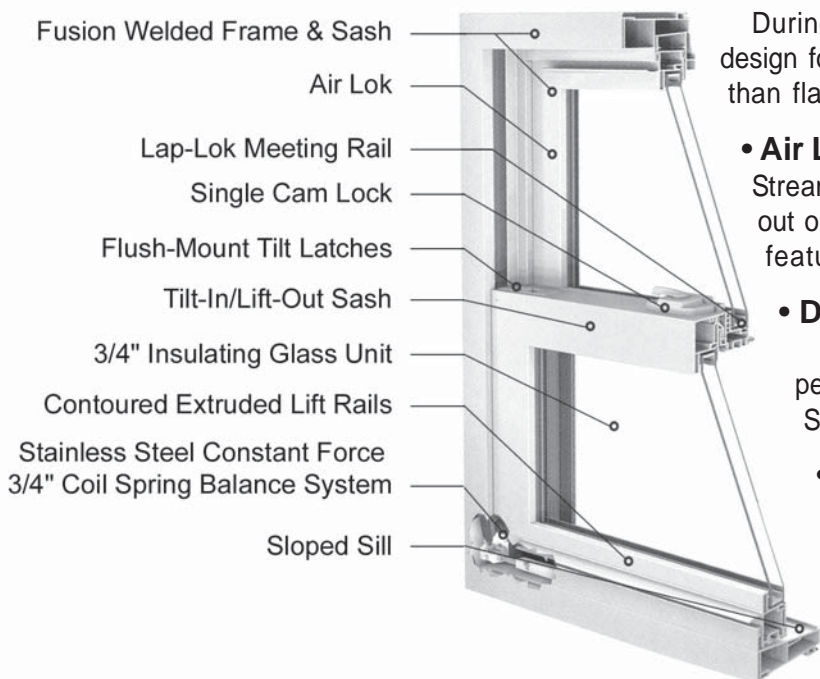

Streamlined air latches allow partial ventilation without opening sash completely - a nice nighttime safety feature!

- **Denny Clip™ Pivot System**

Unique disc-shaped clip helps to maintain perfect alignment of operable sash on Double and Single Hung windows for trouble-free operation.

- **Comprehensive Warranty**

All 5050 & 5500 Series windows and patio doors are backed by a comprehensive warranty covering vinyl, hardware, screens, and insulated glass to provide total peace of mind.

The estimate we have enclosed provides you with the option of choosing either of two Simonton styles – the popular 5050 Series or the top-of-the-line 5500 Series. Here's what the 5500 Series has that is not available on the 5050;

- **Two Air Lok™ instead of one.**
- **Heavier Extruded Aluminum Removable Screen Frames**
- **ProSolar Glass Package with Low 'E' and Argon**
- **Simonton Sloped Step Sill Design**
- **Superior Compression-Type Seals**
- **Additional Weatherstrip Along the Sash Meeting Rail**
- **Beveled Sash Profile**
